

DRINKING WATER PROBLEM CORRECTED

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

ESTE INFORME CONTIENE INFORMACIÓN IMPORTANTE ACERCA DE SU AGUA POTABLE. HAGA QUE ALGUIEN LO TRADUZCA PARA USTED, O HABLE CON ALGUIEN QUE LO ENTIENDA.

As a customer of the City of Franklin Water System,
you were notified on February 14, 2018 of a problem with our drinking water and were advised to consider providing children under the age of 9 with alternative sources of drinking water, or water that has been treated to remove the fluoride, to avoid the possibility of dental fluorosis (teeth discoloration).

We are pleased to report that the problem has been corrected and that it is no longer necessary to restrict your water intake to alternate sources of water. To correct the problem, the City of Franklin has actively flushed our water lines, drained and re-filled water tanks, and temporarily shut down the fluoride addition at both the City water treatment plants. The City has taken daily samples of free and total chlorine, as well as fluoride, since February 9th in order to gauge the levels throughout the entire water system. Other samples were collected and sent to an accredited laboratory for analysis. Recent samples indicate all fluoride levels are below 1.0 mg/L and are continuing to drop. You are now free to use your water as you wish. All residents are still encouraged to continue to flush out their own internal plumbing, both hot and cold water, especially if water appears to be discolored.

We apologize for any inconvenience and thank you for your patience.

Do not hesitate to contact us at the numbers below if you have any questions or concerns.
